WS98-1000 PC software

data sheet

Take control of your welding data

Using all the features of Microsoft® Windows®, WS98-1000 allows you to program, monitor and archive the data in your WS1000 welding control. Connection to the timer is via a fast but simple RS-232 link (cable supplied) and the interface is customizable via enhanced security features to make sure your system runs smoothly. Data can be printed, archived and exchanged with Microsoft Office applications. For the WS1000, WS98 is an essential partner.

features	benefits
easy to use	helps you get your work done
programming, configuration and status windows	parameters arranged in functional groups
multi-user security	allow per-user access to parameters
simple communications	compatible with any Windows PC
built-in printing and archiving	record and store all of your settings
multi-document interface	check the settings from timer or disk
context-sensitive help	explains all features
system explorer	find your programs quickly
